To Whom It May Concern:

MSA P/N 625415, is a bottle of cellulose bands used with a gravimetric dust sampling kit. These bands are considered articles as defined in 29 CFR 1910.1200 (c). Articles are exempt from the OSHA Hazard Communication Standard and therefore no MSDS is required. In order to aid in your understanding of the contents of these cellulose bands, the following table lists chemical components within each bottle at the time of manufacture.

| CHEMICAL COMPONENTS | QUANTITY |
|---------------------------------------------------------|-------------------------------------------------------|
| Cellulose tube | 60 bands |
| Softening and Preservative solution- Based on 100 ml | ~70 ml Polyethylene Glycol (CAS # 25322-68-3) |
| | ~17 ml Parachlorometa cresol (CAS # 59-50-7) |
| | ~4 ml Chlorohexidine Gluconate (CAS # 18472-51-10) |
| | Balance water |

Please note that the environment in which you used cellulose bands may have impacted their content and that it is your responsibility to dispose of cellulose bands in accordance with local, state, and federal laws and regulations. Please provide this information to your regulatory affairs and/or safety officer.

Should you have additional questions, please contact MSA at the above telephone number.
