To whom it may concern:

MSA P/N 10020502, the battery pack used in various MSA portable instruments, is considered an article as defined in 29 CFR 1910.1200(c). Articles are exempt from the Hazard Communication Standard and no MSDS is required for this product. In order to aid in your understanding the contents of this battery cell, the following table lists chemical components within the battery pack at the time of manufacture.

CHEMICAL COMPONENTS	FORMULA	COMPONENT
Nickel Oxyhydroxide	Ni (OH) 2	Positive electrode
Metal Hydride Alloy	AB <sub>5</sub> type	Negative Electrode
Potassium Hydroxide	KOH	Electrolyte

Please note that it is your responsibility to manage spent battery packs in accordance with local, state, and federal laws and regulations. Please provide this information to your regulatory affairs and/or safety officer.

Should you have additional questions contact MSA at the above telephone number.
