To whom it may concern:

MSA P/N 93963 Aldehydes Detector Tube, is considered an article as defined in 29 CFR 1910.1200(c). Articles are exempt from the Hazard Communication Standard and no MSDS is required for this product. In order to aid in your understanding of the contents of this detector tube the following table lists potential hazardous components within this tube at the time of manufacture.

CHEMICAL COMPONENTS	QUANTITY
Toluene	<100 mg
Sulfuric acid	<1000 mg

Please note that the environment in which you used the detector tube may have impacted its contents and that it is your responsibility to dispose of spent tubes in accordance with local, state, and federal laws and regulations. Please provide this information to your regulatory affairs and/or safety officer.

Should you have additional questions contact MSA at the above phone number.
